Mishael Matende

Full Stack Developer

🪪 Profile

I am a passionate software developer who finds joy and excitement in developing and/or crafting products that promote functionality and design.

I am a lover of website responsiveness and the Markdown language.

I excel working both individually and, in a group, /team this is purely because group projects are the best way to get hands on experience when it comes to learning a new concept, framework or programming language. Working individual has huge benefits when it comes to the mastery of the same.

🧠 Skills

- React, JavaScript, PostgreSQL, Tailwind, Bootstrap
- Website Responsiveness, HTML, Native CSS
